WISCONSIN COUNTY, DISTRICT, & STATE FAIRS 2024 ANIMAL HEALTH RULES & REQUIREMENTS

SUMMARY

If a fair or livestock exhibition lasts more than 24 hours the sponsors must appoint a licensed Veterinarian to conduct a daily inspection of all livestock at the fair or exhibition. The Veterinarian shall review all records and test results required under ATCP 10.87. If a fair or exhibition lasts less than 24 hours, all records or test results required by ATCP 10.87 shall be reviewed by a licensed Veterinarian or by the show chairperson. Records shall include exhibitors name and address, identification of animals exhibited including number, type and description, documentation to show compliance with disease testing and other health requirements, and the livestock premise code, if any, of the premises from which the animals originate. If requested by the fair or show organizer, the documentation showing legal importation (if applicable) and movement to the event. Fair management must maintain these records for 5 years.

Please note: Except in specific circumstance, if an animal already bears an official 840 eartag, that eartag must not be removed and additional official eartags must not be applied. Instead the existing eartag must beand recorded when a record of that animal is required.

This is a summary of DATCP animal health requirements for exhibition only. These requirements may change due to animal disease emergencies in Wisconsin or other states. It is always advisable to check with the Wisconsin Division of Animal Health website or call (608-224-4872) for the most recent health requirements when planning to exhibit animals. Animals meeting exhibition requirements may not meet all import or movement requirements for other purposes. The fair and WDATCP have the right to make such tests and examinations as may be necessary to determine the disease status of any animal exhibited.

Animals that show evidence of having contagious or infectious diseases may not be commingled (housed/kept) with other animals at a fair, show or other exposition in such a way as to allow disease to spread. Such animals should not attend the fair, show or exhibition. Animals may be denied entry if they arrive at these events with contagious or infectious diseases, isolated and/or removed if they develop disease after arriving, or be subject to other action as would be necessary to control disease such as removed immediately, quarantined or slaughtered.

Bovine animals with ringworm, mange, warts or scab will be removed from the fair or exhibition premises, unless the veterinarian in charge finds the warts or ringworm lesions are incapable of transmitting disease.

CATTLE AND BISON

Cattle originating from within Wisconsin

There are no test or health document requirements for Wisconsin cattle. However, fair management is responsible for maintaining records of persons who have exhibited at the fair, the livestock premises code, if any, and the identification of animals shown for 5 years. Acceptable forms of animal identification for breeding animals are (1) an official USDA metal ear tag (the brite tag), (2) 15 digit "840" tags, (3) a breed registration number, (4) a breed registration tattoo, (5) other identification approved by the department, or farm ear tag. For steers, either an official USDA metal ear tag or the identification applied at weigh-in may be used. Entry blanks submitted and signed by exhibitors, including one of the forms of identification listed above will fulfill the exhibitor requirements. The fair's records of animals shown and exhibited are to be retained in case these are needed for disease tracing purposes.

Cattle originating from outside Wisconsin

A Certificate of Veterinary Inspection shall accompany all cattle documenting official animal identification and all tests or certifications required. Animals must have at least one form of official individual ID (including steers). Animals must meet normal Wisconsin requirements for interstate movement. The Wisconsin Division of Animal Health website has current import requirements. Acceptable animal IDs for all cattle from outside Wisconsin are official USDA metal ear tags (NUES) (starts with state 2-digit code, also known as "brite" tag); this includes the orange brucellosis vaccination tag, and AIN 15-digit "840" tags (Visual or RFID). Manufacturer-coded RFID tag—15-digit number with first three digits in 900s or American ID tag—8 to 12-digit number prefaced with "USA" are valid only if applied before March 11, 2015.

No cattle from outside Wisconsin are currently required to be brucellosis-tested or vaccinate to come to fairs and shows in Wisconsin.

Tuberculosis requirements for cattle from outside Wisconsin

For requirements by state, see https://datcp.wi.gov/Pages/Programs_Services/CattleBison.aspx

Cattle originating from Michigan's TB Free

As of 1/1/2023, all cattle from Texas and Michigan's TB Free Zone, regardless of sex or age, are required to have a negative TB test within 60 days prior to import.

Cattle originating from **Michigan's Modified Accredited zone** also need 1) Import permit, 2) To originate from a herd that has a negative whole-herd TB test within 12 months before arrival in Wisconsin that includes all animals 1 year and older, 3) Negative individual TB test

Cattle from Canada may be exhibited in Wisconsin if they meet current federal requirements to cross the international border.

SWINE

Swine originating from within Wisconsin

All swine shall be accompanied by a Wisconsin Intrastate Movement Certificate stating that the herd of origin has been inspected on the farm within 30 days prior to the exhibition and showed no signs of disease.

NOTE: Herd of origin means the herd in which the pigs currently reside, likely the exhibitor's herd. When pigs are purchased from a herd, the herd from which they originate is the herd of origin for the seller. Once the purchased pigs are added into the buyer's herd (even if the buyer's herd only consists of one or just a few animals), the buyer's herd becomes the new herd of origin and that herd must meet the testing requirements to move pigs again.

Non-terminal Exhibitions: All swine must have a PRRS (Porcine Reproductive and Respiratory Syndrome) and PEDv (Porcine Epidemic Diarrhea virus) test of the herd of origin within 90 days of the exhibition. On the CVI, the test date, type of test and results of the test are to be included on the form. For swine originating from herds with positive tests, the herd plan number is to be included on the CVI.

Terminal Exhibitions: No testing requirements.

Terminal exhibitions are those at which the swine go directly from the fair/show to the slaughtering establishment OR to a slaughter only market sale. If going to a slaughter only market sale, contact the Division of Animal Health fair inspector for required information to collect.

The certificate must also include all required test documentation.

3) A statement that the veterinarian has inspected the entire herd of origin within the past 30 days and that no

clinical signs of PRRS and PEDv or any other apparent disease was present at the time of inspection

4) If the herd of origin tests positive for PRRS and/or PEDv, contact the DATCP at 608-224-4872 for options.
